

Simply legendary: uvex legend pro

All-mountain redefined – that’s the uvex legend pro. This 400-gram lightweight, hardshell ski helmet stands for German engineering, innovative design and outstanding safety performance. Its stand-out feature: the vent system is inspired by nature, tested and optimised in the wind tunnel and individually adjustable.

Bring together uvex R&D safety experts and professional winter sports athletes to work on a new all-mountain ski helmet and the results are always going to be promising. The new uvex legend pro is the fruition of over 28 months of intensive development from drawing board to finished product. This is because of the extensive testing and optimisation conducted both in the wind tunnel and on the slopes and the project team’s desire for perfection. They went the extra mile to create a top-quality product that will set new benchmarks.

Top performance, safety and style made in Germany

The uvex legend pro has a striking appearance right from the moment go. No other helmet features such a distinctive, active ventilation system. Three large front openings draw air into the inside of the helmet through deep air channels. Warm air is effectively conducted away via numerous openings cleverly integrated into the side and back of the helmet for optimal air circulation. Skiers can simply regulate air flow intensity using a lever. The uvex legend pro is a robust hardshell helmet with a highly effective safety construction that combines an injection-moulded outer shell and EPS inner shell – all weighing just 400 grams. Its advantages are clear for all to see. The all-mountain ski helmet is extremely impact resistant on the outside and shock-absorbing and insulating on the inside. For additional comfort, the uvex legend pro is equipped with a breathable, moisture-regulating Coolmax® lining. Innovative 3D mesh padding insulates, yet still allows effective heat exchange. Uvex’s water-resistant ear pads, and the revolutionary, award-winning Fidlock® magnetic closure

system round off the comfort extras. With the proven 3D IAS system, the helmet is easy to adjust, in both height and width, to fit the individual head shape. The ergonomically-shaped adjustment wheel at the back of the head is also easy to use when gloved up. The uvex legend pro is available in three sizes (52-55 cm, 55-59 cm and 59-62 cm) and four outstanding matt colours with contrasting accents (yellow mat, leaf mat, all black mat and oxy red mat).

RRP: 139.95 euros

About the uvex group

The uvex group brings together three international companies under one roof: the uvex safety group, the uvex sports group (uvex sports and ALPINA) and Filtral. The uvex group is represented in 22 countries by 48 subsidiaries but opts to locate most of its manufacturing in Germany. Two thirds of the company's 2,700-strong workforce (as of December 2019) are employed in Germany. As an outfitter for numerous top athletes, uvex acts as a global partner for international competitive sports. It views its mission statement of "protecting people" as its mandate and duty. To this end, uvex develops, manufactures and distributes products and services for the protection of people at work, sport and leisure.
